1. Do not place near heat sources, such as radiators, heat registers, or appliances which produce heat.
2. Guard against objects or liquids entering the enclosure.
3. Refer all servicing to qualified service personnel.
4. Prolonged listening at high volume levels may cause irreparable hearing loss and/or damage. Always be sure to practice "safe listening".

Follow all instructions and heed all warnings
KEEP THESE INSTRUCTIONS!

Product Interface

1.POWER Jack
Use a regular 9V DC adaptor with Negative Tip to power this pedal. It's highly recommended using the optional NUX ACD-006A adaptor. Using an incompatible adaptor may cause noise or malfunction.

2.VOLUME Knob
Sets gain level of this pedal.

3.MASTER Knob
Sets the output level of this pedal.

4.CUT Knob
Sets the high-frequency of this pedal.

5.TOP BOOST TOGGLE
Engage the high-frequency boost.

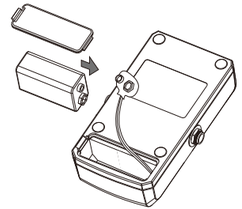

6.OUTPUT Jack
Connect an amplifier into this jack.

7.INPUT Jack
Connect your guitar into this jack. Plugging in this jack switch on the power whether the effect is engaged or disengaged. When not using this pedal, disconnect the cable from this jack to save battery life.

8.LED Indicator
Display pedal working status.

9.Footswitch
Engage / Disengage the effect.

Installing The Battery

A battery is supplied with the unit. Connect the snap cord to the battery and insert the battery as shown in the drawing. When the battery runs down the sound will change. In such case please replace with new battery. The power comes on when you insert the plug into the INPUT jack. The use of an AC adaptor is recommended as the unit's power consumption is relatively high.

Accessories

●9V battery ●Owner's manual ●NUX sticker
