- Hardwired to headset

Music Education or Computer learning

Share audio together

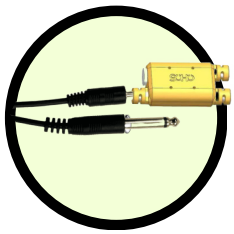

SOHO
Sound Company

Audio Link®

Audio sharing headphones for students

Tested by kids of all ages, these headphones are tough to break!

Soho Link allows a second audio output for every set of headphones.

Let 2 students pair up when working on a laptop, or let the teacher plug in to the students Link Aux to join their project.

You can link multiple headsets together to create an even larger private audio group.

Are you tired of losing jack plug adaptors? Or possibly fed up of seeing students use them as missiles?

Soho Audio link gives you both 1/4'' and 3.5mm Jack inputs as standard HARD WIRED.

At SOHO our roots are in music.

The Audio link enables you to use comfortable, strong and hard wired headphones on multiple devices from laptops and tablets, to guitar amps and keyboards.

From London with Love.

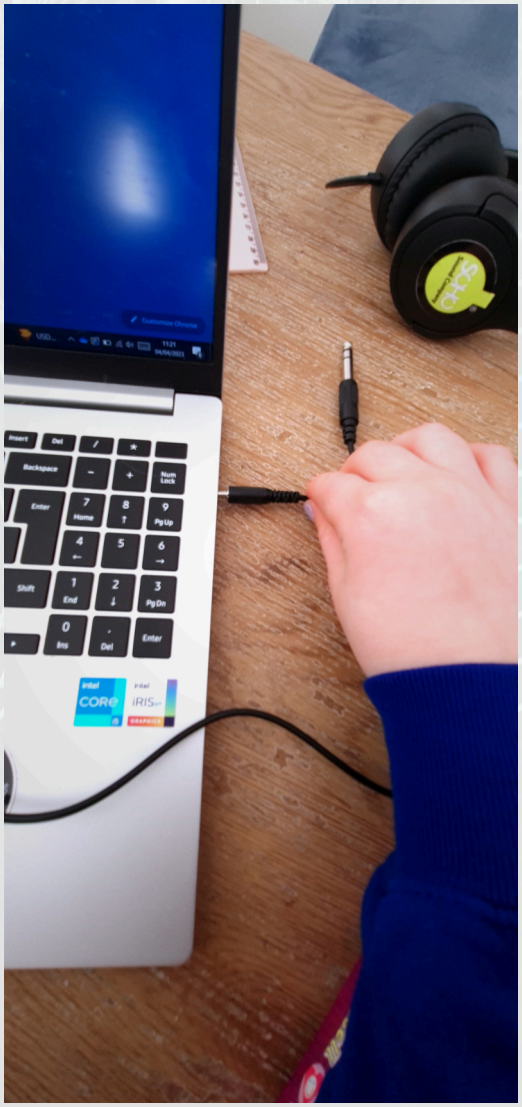

SOHO SOUND COMPANY is an independent British business with over 30 years of experience selling to the education markets world wide.
