Elegant, portable, European-made piezoelectric solutions for acoustic instruments.

HANDCRAFTED PICKUPS

GUITAR / UKULELE SERIES

UK - 1

Portable piezo pickup for ukulele.
A passive design that's held in place by string tension, UK-1 fits most soprano, concert, tenor and baritone ukuleles with a tie bar. The system includes a 1/8" to 1/4" detachable cable.

SG - 1

Portable piezo pickup for steel-string guitar.
A small and unobtrusive system voiced for steel strings, SG-1 fits discreetly between the guitar's saddle and bridge pins, and comes complete with a 1/8" to 1/4" detachable cable.

NG - 1

Portable piezo pickup for nylon-string guitar.
A passive design that's held in place on the tie bar by string tension, the system includes a 1/8" to 1/4" detachable cable.

MAGNETIC SERIES

SP - 1

Single-coil steel-string acoustic pickup.
Installing easily into the soundhole of most steel-string guitars, SP-1 employs ferrite magnets for a fast and articulate attack. The pickup captures the sound of your acoustic and delivers a dynamic, clear and balanced amplified tone. No modification to instrument is necessary.
The KNA SP-1 conveniently accepts a 1/8" cable.

HP - 1

Humbucking steel-string acoustic pickup.
Installing easily into the soundhole of most steel-string guitars, HP-1 utilizes the power of neodymium magnets. The pickup captures the sound of your acoustic and delivers a warm, clear and balanced amplified tone. No modification to instrument is necessary.
The KNA HP-1 conveniently accepts a 1/8" cable.

TOP-MOUNT SERIES

AP - 1

Portable piezo for guitar and other instruments.
This system features a passive transducer that installs safely and securely with self-adhesive, and includes a 1/8" to 1/4" detachable cable.

AP - 2

Portable piezo with volume control.
This system features a passive transducer with onboard volume control that installs safely and securely with self-adhesive, and includes a 1/8" to 1/4" detachable cable.

UP - 1

Portable piezo, universal fit.
For nearly any instrument with a top soundboard, UP-1 installs easily to the surface for a quick solution to transfer signal without miking. UP-1 comes with a detachable cable, allowing the pickup to remain in place as the instrument is in its case.

UP - 2

Portable piezo, universal fit plus volume control.
Offering all the features of UP-1, an onboard volume control is added to UP-2 for extra versatility onstage or in the studio.

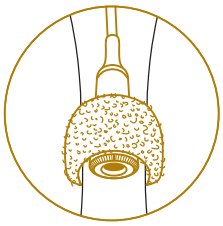

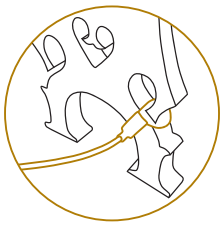

CELLO / DOUBLE BASS SERIES

VC - 1

Portable piezo pickup for cello.
This passive sensor installs in the eye slot of the bridge and connects to a 1/4" jack that attaches securely to the tailpiece with a Velcro band. Tone wood shims are included.

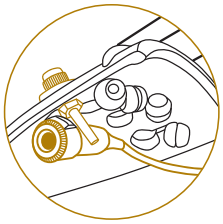

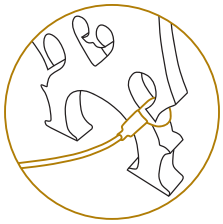

DB - 1

Portable piezo pickup for double bass.
This passive sensor installs in the eye slot of the bridge and connects to a 1/4" jack that attaches to the tailpiece string slot with no modification to the instrument required. Tone wood shims are included.

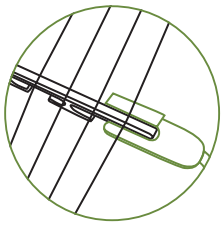

FOLK SERIES

BP - 1

Portable piezo pickup for banjo.
A passive-design sensor that easily clips to either side of the bridge, BP-1 works on most traditional-style banjos. The jack housing accepts a 1/4" standard instrument cable.

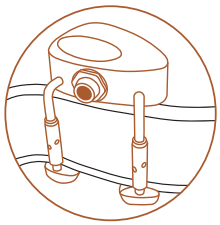

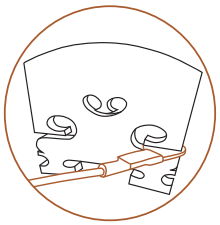

VIOLIN / VIOLA SERIES

VV - 1

Portable piezo pickup for violin and viola.
Passive sensor installs at bridge. Jack housing and clamp feet are lined with protective cork. Output accepts a standard 1/4" instrument cable.

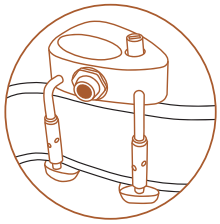

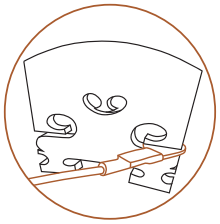

VV - 2

Portable piezo pickup for violin and viola with volume control.
Passive sensor installs at bridge. Built-in potentiometer allows volume control from the stage. Protective cork keeps instrument safe. Output accepts a standard 1/4" instrument cable.

VV - 3

Portable piezo pickup for violin and viola with deluxe ebony jack housing.
Passive sensor installs at bridge. Solid ebony jack housing and clamp feet are lined with protective cork. Output accepts a standard 1/4" instrument cable.
