

A Powerful 30W Portable Wireless Modeling Amplifier

THIS SMALL YET COMMANDING, WIRELESS 30-WATT MODELING AMPLIFIER IS THE PERFECT TOOL FOR THE STUDIO, THE BEDROOM, OR ANY SPACE YOU PUT IT IN!

Amps

TS/AC-HD White-Box Amp Modeling Algorithm

The white-box algorithm offers real time-feedback, increment-by-increment. NUX TS/AC-HD replicates the same playability most guitarists prefer in a real tube amplifier.

Impulse Responses

Guitar Cabinets: JZ120, DR112, TR212, HIWIRE412, CALI 112, A112, GB412, M1960AX, M1960AV, M1960TV, SLO412, FIREMAN 412, RECT 412, DIE412, MATCH212, UBER412, BS410, A212, M1960AHW, M1936, BUDDA112, Z212, SUPERVERB410, VIBROKING310

Bass Cabinets: AGL_DB810, AMP_SV212, AMP_SV410, AMP_SV810, BASSGUY410, EDEN410, MKB410

Acoustic Guitar IRs: G-HBIRD, G-J15, M-D45

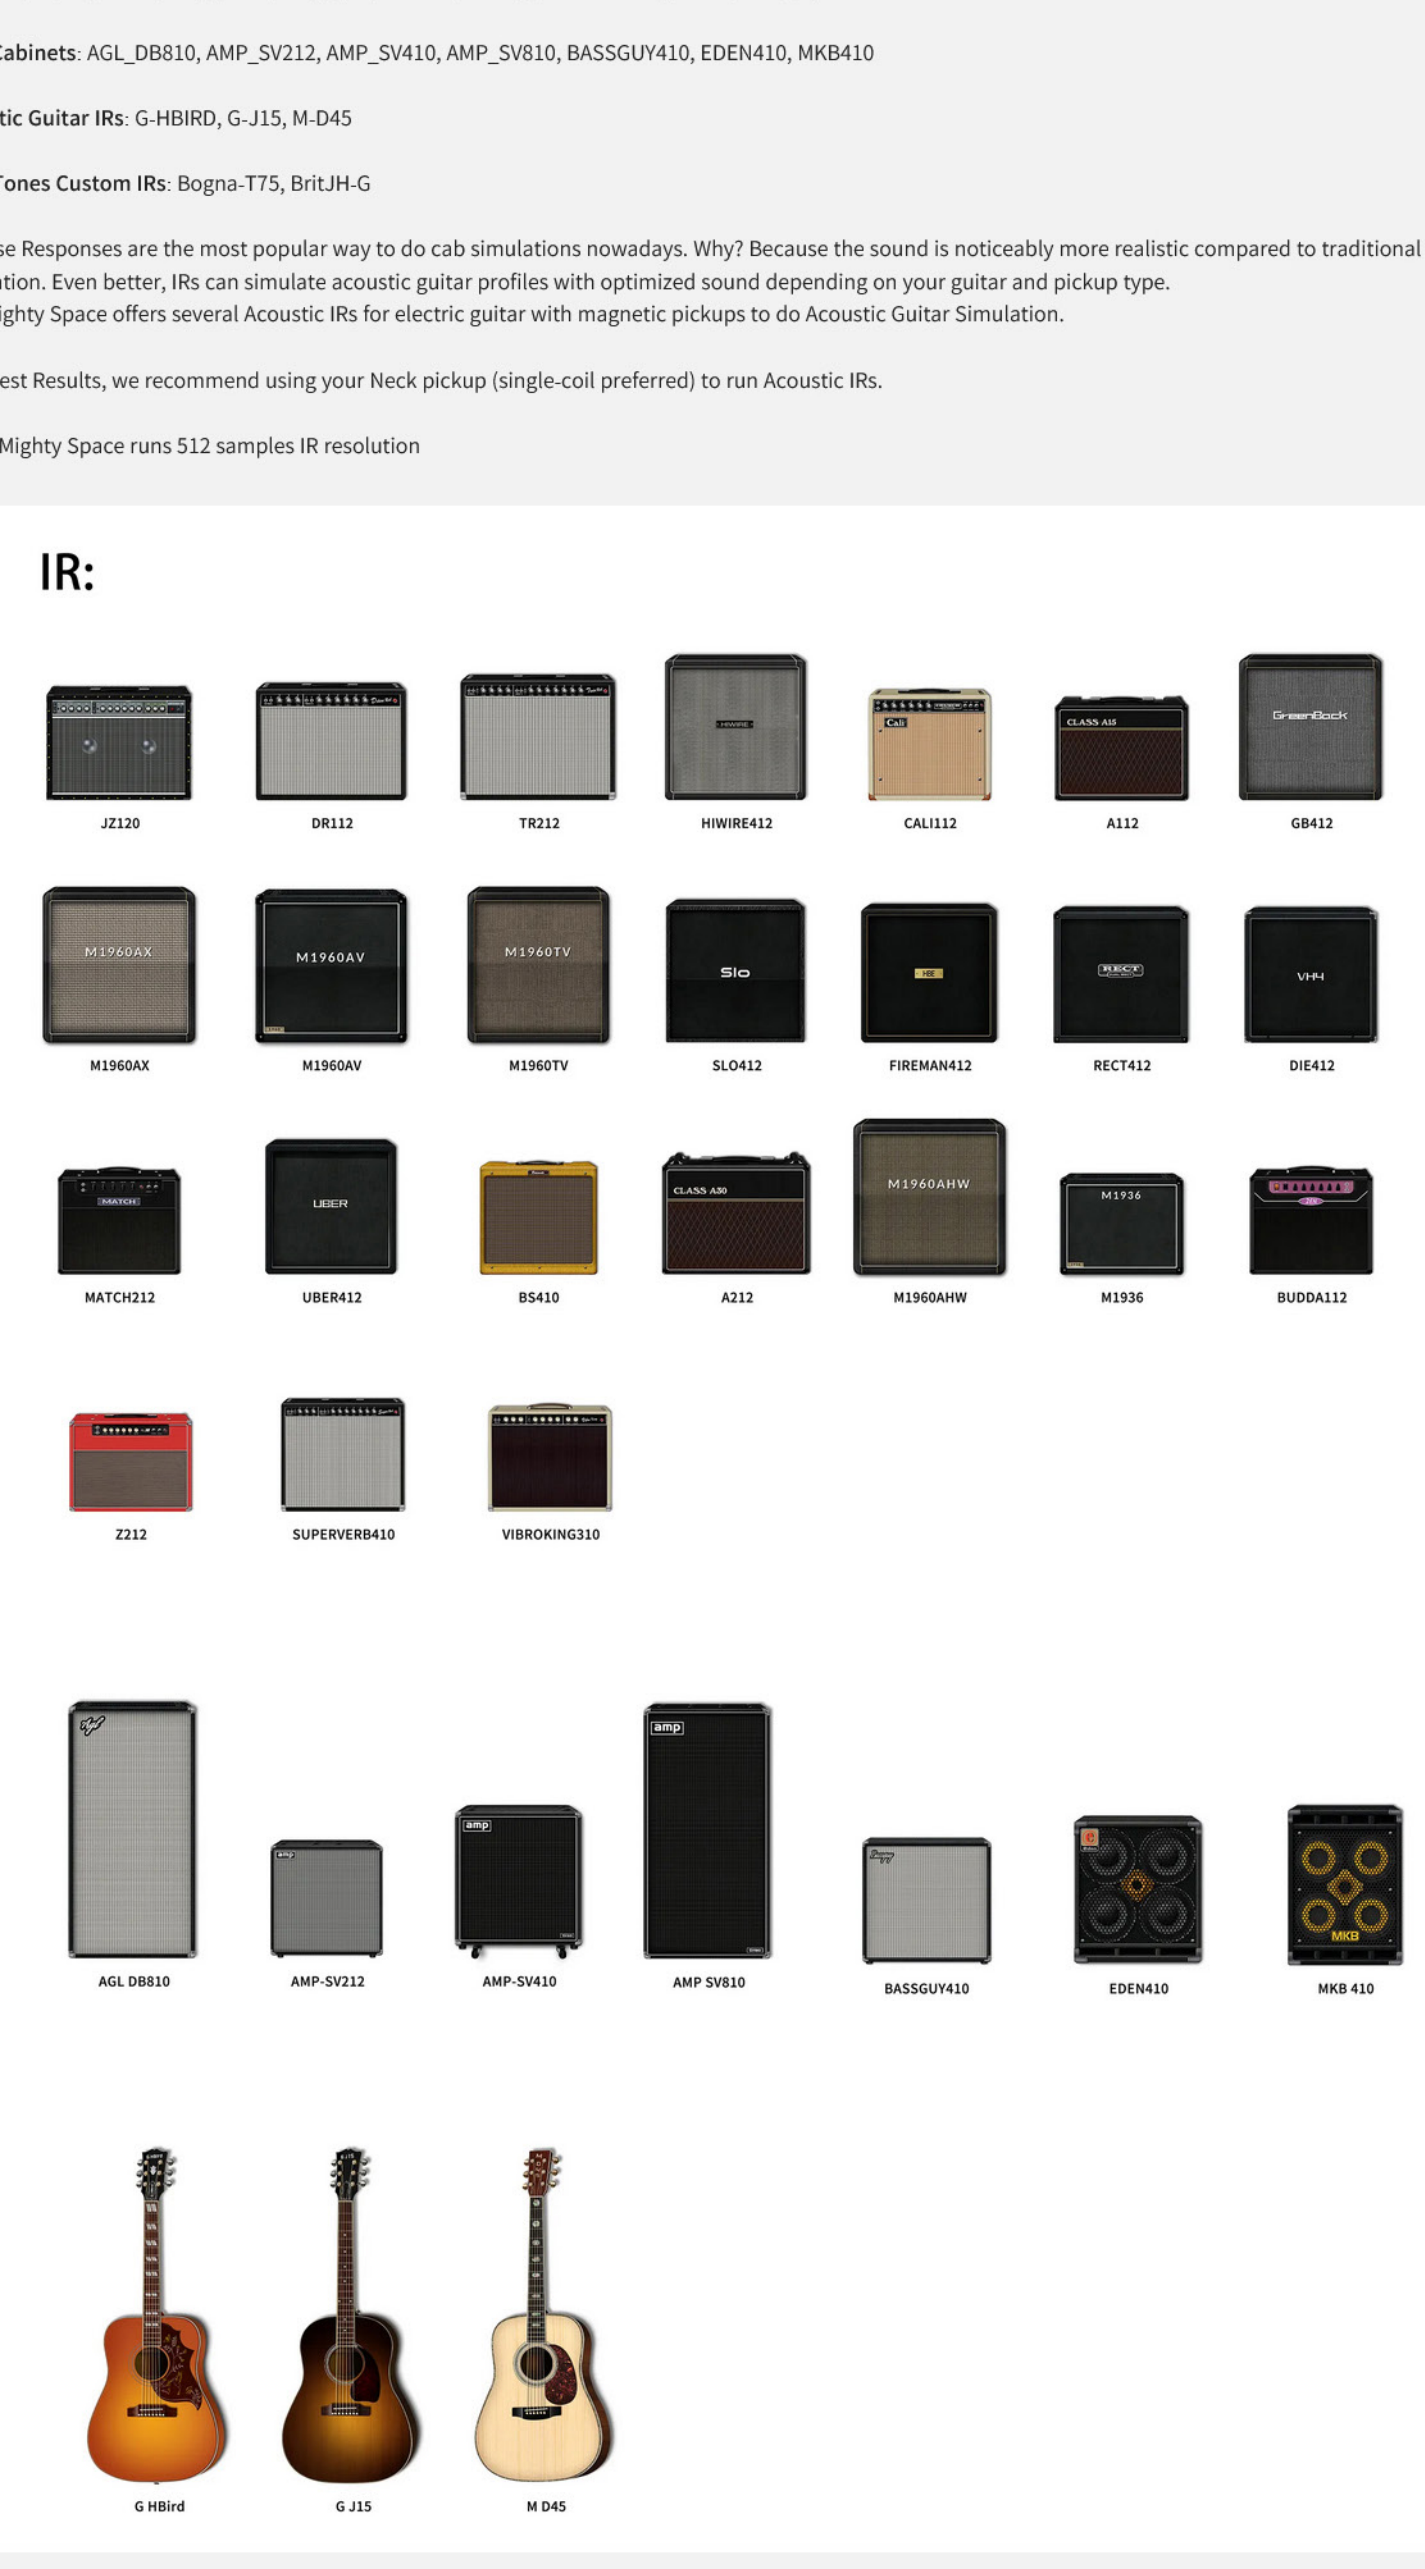

ChopTones Custom IRs: Bogna-T75, BritJH-G

Impulse Responses are the most popular way to do cab simulations nowadays. Why? Because the sound is noticeably more realistic compared to traditional cab simulation. Even better, IRs can simulate acoustic guitar profiles with optimized sound depending on your guitar and pickup type.
The Mighty Space offers several Acoustic IRs for electric guitar with magnetic pickups to do Acoustic Guitar Simulation.

*For Best Results, we recommend using your Neck pickup (single-coil preferred) to run Acoustic IRs.

Note: Mighty Space runs 512 samples IR resolution

IR:

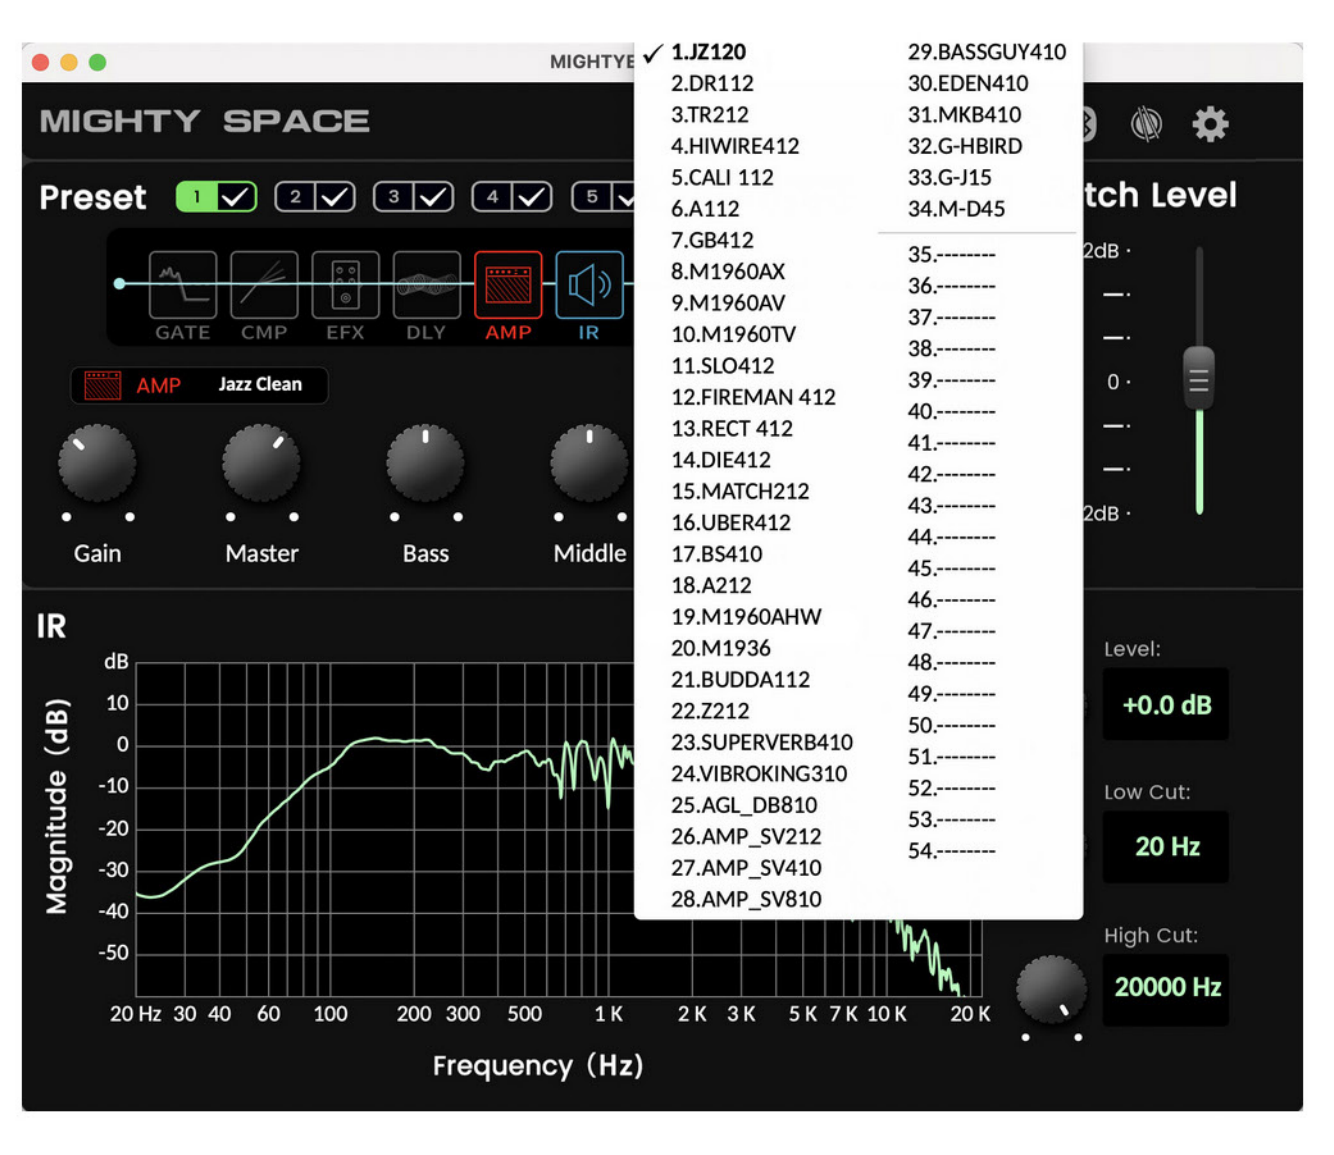

EFX

Effects: GATE, CMP, EFX, EQ, MOD, DLY, RVB
With the included editor software for Mac, PC, iOS, and Android, our incredibly flexible block routing will inspire virtually endless tone creations. You can drag any block to desired position.
For the CMP & EFX (Dynamic Based), the WHITE-BOX algorithm replicates the playability and responsiveness of the original analog circuit. The Mighty Space includes over 40 effects ranging from classic overdrives, to chilling modulation, to smooth reverb, and much more.

*All brands and model names mentioned on this page are Trademarks of their respective owners, which are in no way associated or affiliated with NUX Effects and Cherub Technology CO. LTD.

Expand Your Tones! Want more cabs for your Mighty Space? Use the Mighty Editor on your Mac/Windows computer to expand your cab library by loading up to 20 3rd party IRs. Load any WAV format IRs and the Mighty Editor™ will convert to 32bits/48kHz automatically.

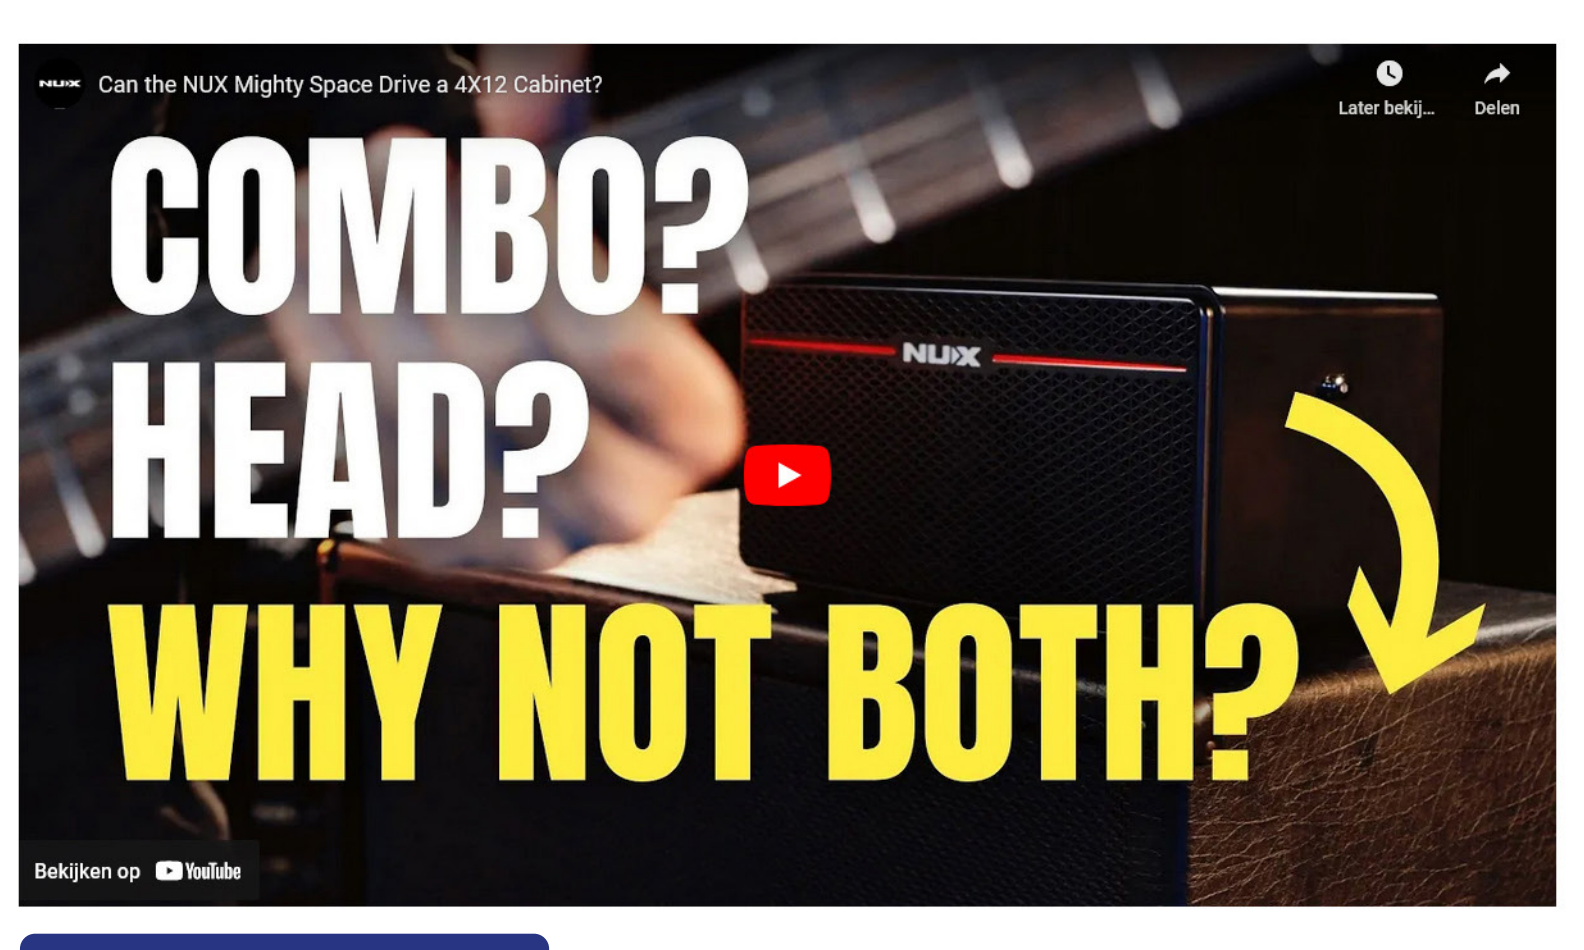

Note: There are 34 default IRs, and user IR slots are 20 (from 35 to54).

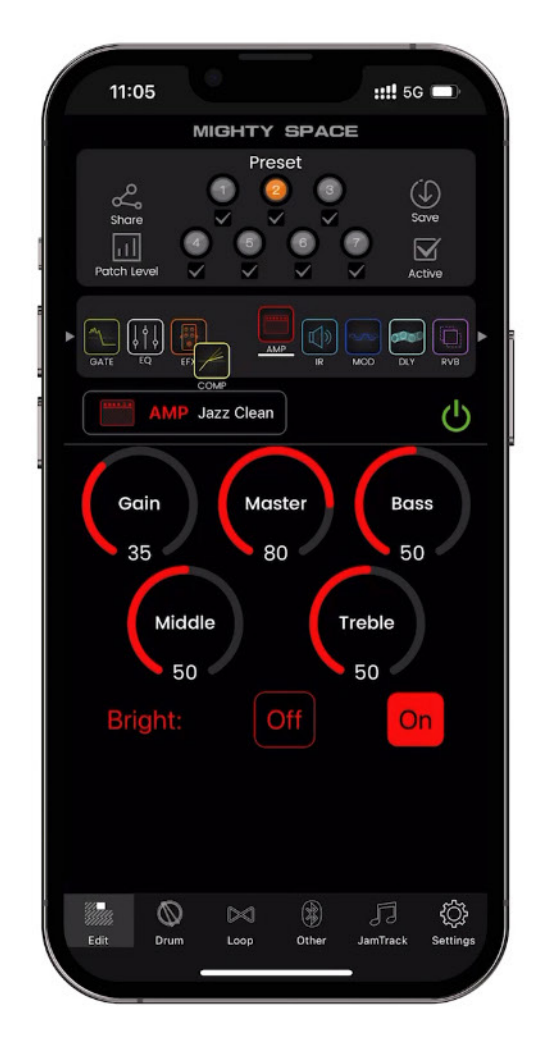

Quick-Play Wireless Versatility

As a pro model, Mighty Space surely comes with the NUX wireless transmitter, and sets the new standard for practice amplifiers with its complete wireless* versatility. The included transmitter and onboard receiver wireless system can work well with any guitar/bass, active pickups or passive pickups.

*For more info, please check the NUX B-5RC webpage.

MightyAmp™ APP & Mighty Editor™ Edit Software

Customize the presets via the MightyAmp™ APP (mobile) or Mighty Editor™ edit software (Mac/Windows). Change the order of the effect blocks? Why not? You can do lots of things with the intuitive interface, experience it for yourself!

The MightyAmp™ APP and Mighty Editor™ edit software can let you tweak all the signal blocks and parameters. Mighty Space offers GATE, COMP, EFX, AMP, IR, EQ, MOD, DLY and RVB, which lets you adjust the block order freely.

The Mighty Space supports USB-C audio stream, it can be a wireless USB-C recording interface. It supports Normal / Dry Out / Re-amp / Loopback routing, you can adjust it through MightyAmp™ APP or Mighty Editor™ edit software intuitively, no need to setup USB OUT in DAW. Even live stream jamming with Loopback!

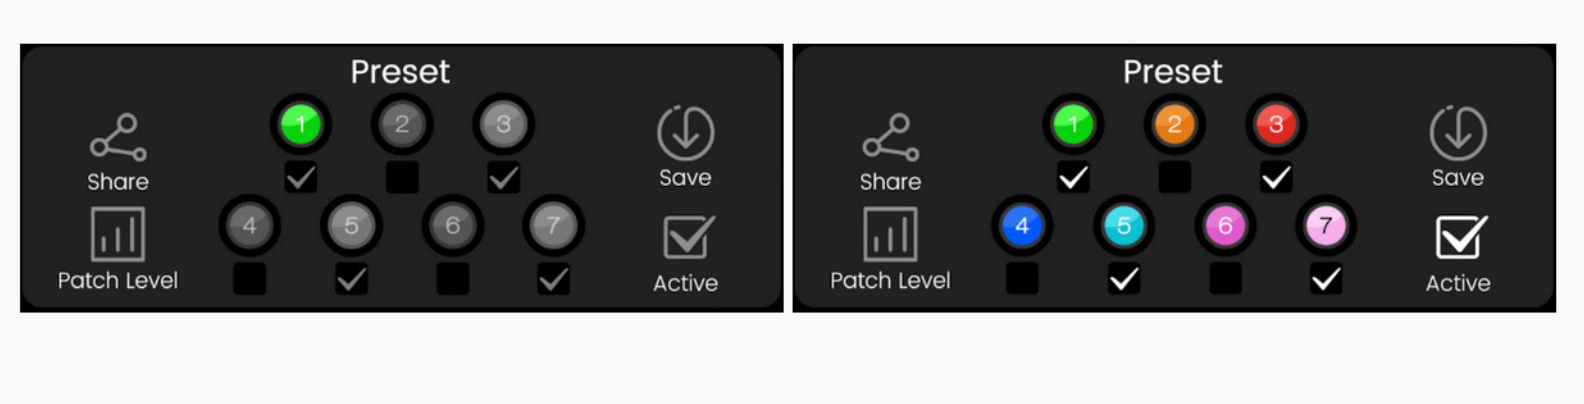

* Thank you Dian Iliev and our Mighty Plug / Air FB Group Members to help inspire us to develop Mighty Space with great functions and APP experience.

Preset:

While the device is engaged, you can press the PRESET switch to change the preset from 1~7. The indicator will show different color related to different preset.

Note: You can adjust which preset can be ACTIVE while you press the PRESET switch through MightyAmp™ APP or Mighty Editor™ edit software. (ACTIVE function)

MightyAmp™ APP example: Try choosing PRESETS 1, 3, 5, 7 then press the Active icon. The Mighty Plug Pro will remember PRESETS 1, 3, 5, 7 when you press the PRESET switch.

Mighty Editor™ example: Click ☑ icon, the 7 presets will be colored, then choose the ones you want to active, like 1, 3, 5, 7. Then press ☑ icon again, Mighty Editor™ will show current preset, and according to the interface, you will see which is be chosen with ☑.

Control Panel & I/O Jacks

Dual 4" Loud Coaxial Speakers

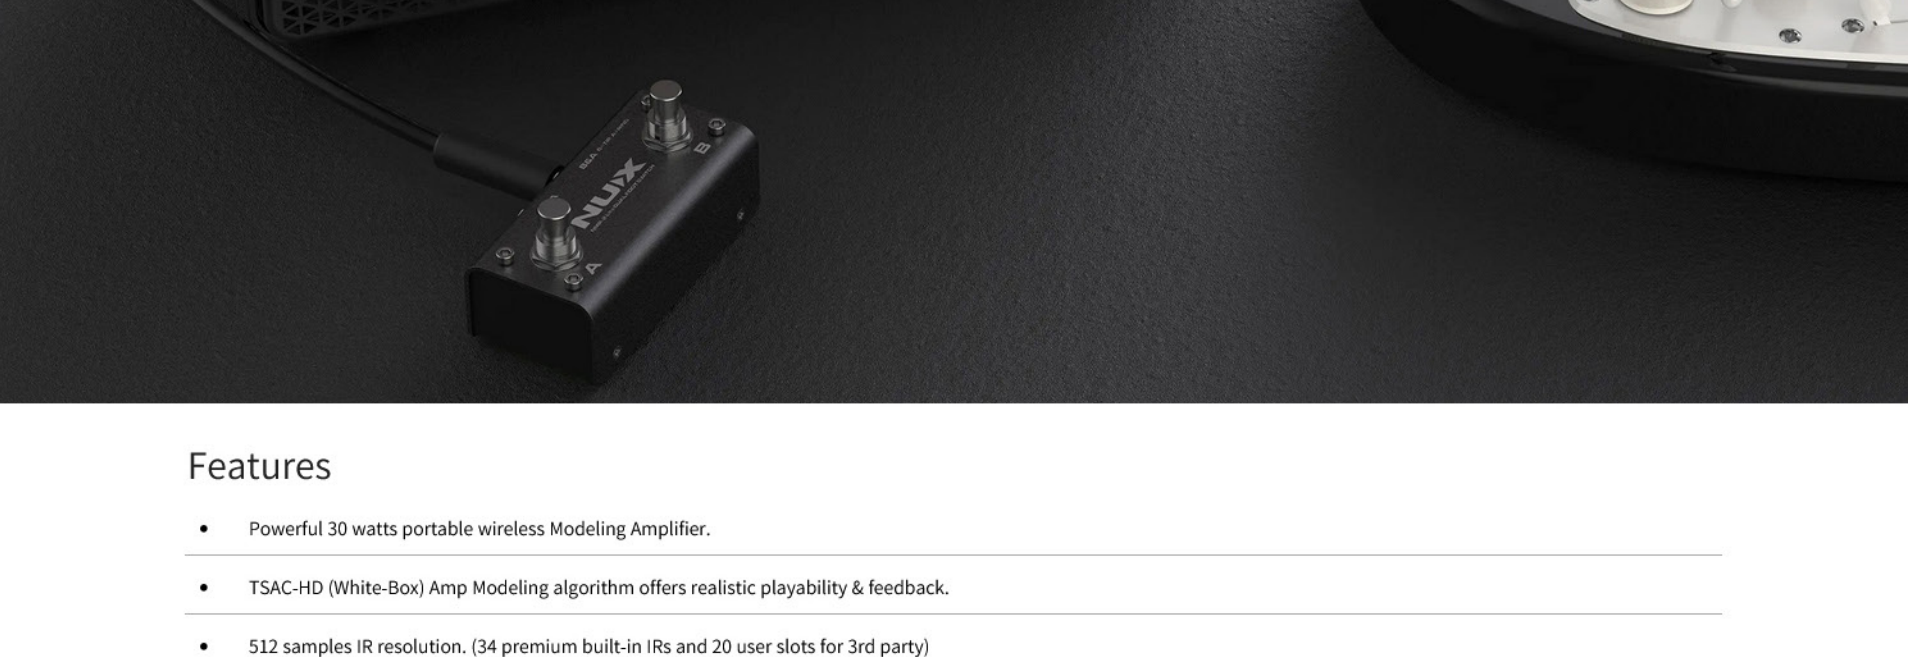

7hrs playing time. (11.1V / 5000mAh)

Drum & Loop with included NMP-2 Lite footswitch control.

Features

- Powerful 30 watts portable wireless Modeling Amplifier.
- TSAC-HD (White-Box) Amp Modeling algorithm offers realistic playability & feedback.
- 512 samples IR resolution. (34 premium built-in IRs and 20 user slots for 3rd party)
- 7 presets with ACTIVE functions. (PRESET switch toggles ACTIVE ones sequentially.)
- GATE, CMP, EFX, AMP, IR, EQ, MOD, DLY, RVB effect blocks with free order.
- White-box algorithm EFX offers analog response and natural chaos.
- Stereo DLY / RVB effects with gorgeous tone.
- Patch Level function for each preset.
- Drum & Loop with included NMP-2 Lite footswitch control.
- 7hrs playing time. (11.1V / 5000mAh)
- Ultra-low system latency: 1.2ms
- Intuitive MightyAmp™ APP & Mighty Editor™ edit software(3rd party IR loader).

Specifications

Input Impedance	1MΩ	Battery	11.1V / 5000mAh
Earphone Output Impedance	32Ω	Current Draw	11.1V/220mA
Sampling Rate	48KHz / 32-bit	Dimensions	363 (L)X 171 (W)X 171 (H)mm
System Latency	1.2ms	Weight	4.06Kg
